**Be part of something that changes lives.**

## Well Fundraiser

Beacon of Power Academy provides primary and secondary education to over 100 of the poorest children in the Solwezi area of Zambia. New Life Church Bristol has over many years contributed to the development of facilities, financial support for the staff and the sponsorship of the primary school. We are raising money to fund the digging of a bore hole, a water pump and storage container in order to provide running water to the school and the local community in it's location.

Our Target is: **£5,000**

To give please visit :

<http://uk.virginmoneygiving.com/fund/Wellfundraiser>

or visit [www.school4kids.org](http://www.school4kids.org) and click on the Donate button.

At time of publication we have raised

**£1,446.00**

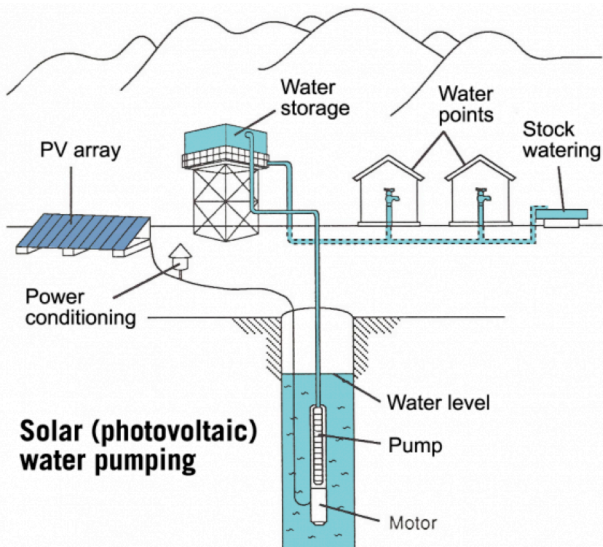

Tell your friends, family and colleagues and let's get this water flowing for the school and local community.

Currently there is a hand dug well on the school site, which is not deep enough to provide a continuous supply of clean water to the school. We need to raise money so that machines can be used to make the well deep enough to reach the clean water.

## How does a borehole work?

A water borehole taps into aquifers, which are underground stores of water created by rainfall and evaporation in permeable geological matter. A seal near the top of the borehole closes the drill hole to the pipe and this prevents surface water, which may be polluted, from entering the borehole.

## School Sponsorship changes lives!

School sponsorship is a great way of supporting the long term development of education in Solwezi, Zambia. In return for your support we will keep you updated on the progress of the school and the children that attend it.

By making a regular monthly donation, you provide a steady and predictable flow of resources that allows the school to work effectively.

## Things are changing in Zambia

54 years after independence, has one of the world's fastest growing, if still relatively small, economies.

People's life expectancy, education level and income are improving. More than half of the country under the age of 25, there's a lot of energy and optimism for the future.

However, this progress has not been shared equally among Zambians. A huge proportion of people, 6 in 10, still live below the poverty line, and the gap between rich and poor is widening.

1 in 10 people are affected by HIV/AIDS and even more are disabled. They are particularly at risk from the lack of clean water and decent, accessible toilets across the country.

A child should never have to drink water from the same place as wild animals.
